KENYA

Year 2010 has so far been a blessing to all Kenyans. As highlighted earlier, Kenya and the better parts of Africa have been going through a severe drought caused by lack of substantial rainfalls since year 2006. Early last year, the Kenyan government and the UN declared a state of emergency, saying 10 million people in Kenya faced hunger and starvation after a poor harvest, crop failure, a lack of rain and rising food prices. We praise God as this is now behind us. We have been receiving substantial rainfalls since October last year, and come February 2010, there has been a bumper harvest thus making the availability of food easy and the very high and unaffordable costs have been cut down.

For the above reason, we have been able to add vegetables and fruits to our 105 children's diet and the results are less illnesses and better concentration in class.

Thank you dear sisters and brothers for making it all possible for the Hope Mission Family to be what it is today. We give God all the glory.

We Love you!

M. N. Gitu
Project Coordinator
