OCTOBER 2010 NEWSLETTER

Despite a few challenges here and there, we had a successful month. We had a measles outbreak, that, thanks to God, we caught before it became an epidemic. Measles started within a family and the mother sent the sick children to school. By the time it came to our attention about 10 children were victimized.

We had our midterm break that took place on the 18th to the 20th. Classes resumed on 21st. We really enjoyed the break.

The parents keep bringing positive reports on their children's academic improvement and are very grateful for this education and feeding program that has been of great help to their children and to the community at large.

We give God the glory!

Miriam Gitu
